

GENERAL PREPAREDNESS

Being prepared in advance can save your life during an emergency. Follow these important tips to prepare yourself and your community before a disaster strikes.

- Create an emergency kit for your home and vehicle.
- Have enough food, water, and medical supplies to last 3 to 5 days without help from others.
- Keep a current list of the medications you are taking.
- Make a communication plan with family and friends in case you are separated.
- Fuel your car and review your evacuation plan and routes with your family.
- Be familiar with alerts, warnings, and local emergency services.
- Keep important documents, both personal and financial, in a waterproof portable container.
- Keep food, water, and medicines on hand for pets. Make plans to ensure their safe shelter and care.
