Weekly Cold-related Illness Surveillance Report

February 8, 2017
Reporting for January 31, 2017 to February 6, 2017

National Weather Service Forecast: No current advisories
Wind Chill Advisories Declared During This Week: 0
Total Wind Chill Advisories Declared This Winter: 3

Note on Emergency Department Data: The results from the query used in ESSENCE, an electronic biosurveillance system, to track cold-related illnesses may be an overestimation of the actual burden of illness related to the cold weather. This overestimation is due to the nature of the query, which includes the term hypothermia and frostbite.

Note on EMS Data: These data are based on EMS pre-hospital care reports where the EMS provider has selected hypothermia as a primary or secondary impression of a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with cold exposure, the actual numbers may be low. These data are reported for trending purposes only.
Date | Number of Chief Complaints Regarding Cold-related Illness | Number of Chief Complaints Regarding Carbon Monoxide Exposure
--- | --- | ---
January 31 | 2 | 3
February 1 | 4 | 0
February 2 | 0 | 0
February 3 | 0 | 0
February 4 | 3 | 1
February 5 | 1 | 1
February 6 | 1 | 0

*Note: ESSENCE chief complaint query for cold-related illness contains the following terms: frostbite, frostnip, hypothermia, chilblain, and trench foot

There were no chief complaint clusters identified this week.

Geographical and Age Group Distribution of Emergency Department Chief Complaints Regarding Cold-related Illnesses for January 31, 2017 through February 6, 2017

*Geographical distribution of emergency department chief complaints is based on patients' jurisdictions of residence. The "Other Region" category includes patient records without a ZIP code and patients who reside outside of Maryland.
