

October 30, 2015

**Public Health Preparedness and Situational Awareness Report: #2015:42
Reporting for the week ending 10/24/15 (MMWR Week #42)**

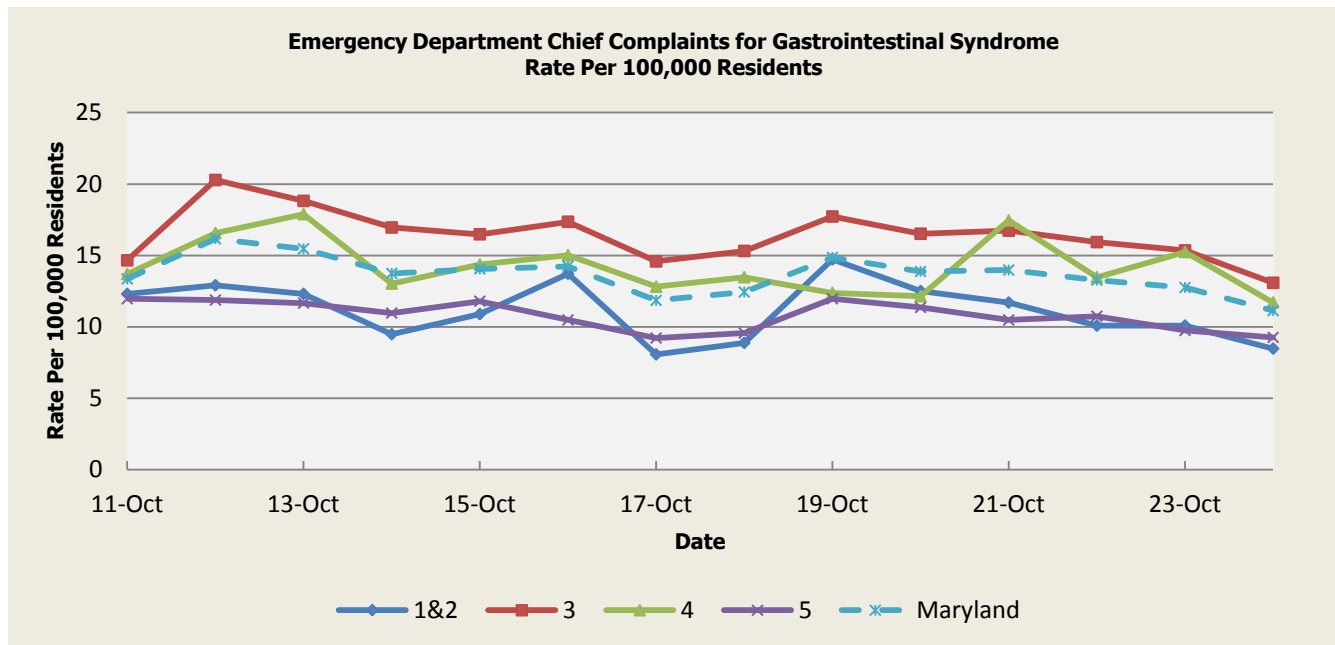

CURRENT HOMELAND SECURITY THREAT LEVELS

National: No Active Alerts
Maryland: Level Four (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics):

Graphical representation is provided for all syndromes (excluding the "Other" category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census.

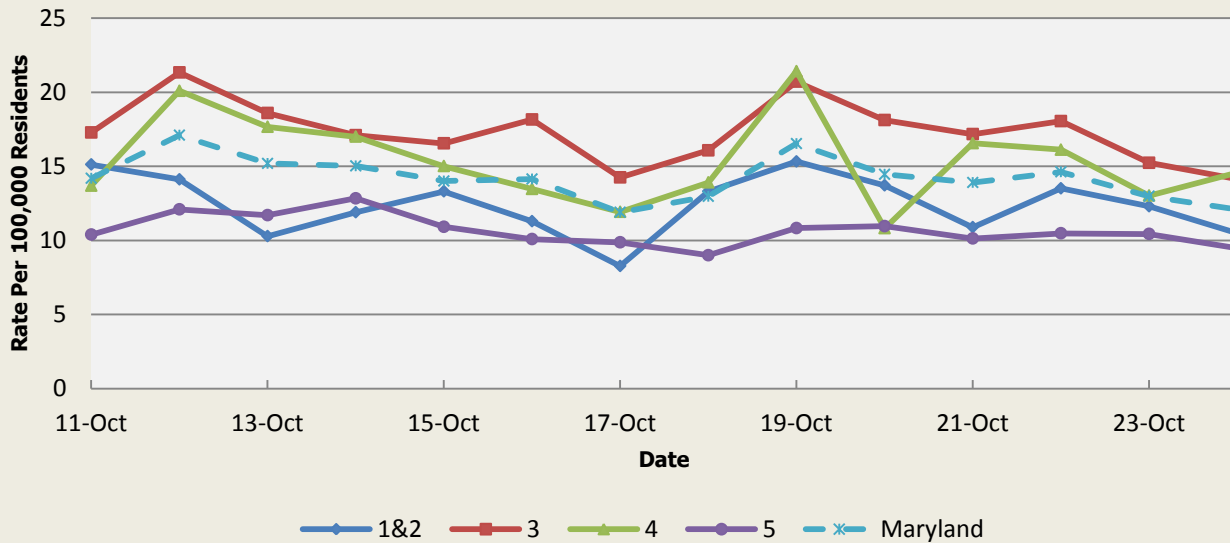

There were 4 gastrointestinal illness outbreaks reported for Week 42: 1 outbreak of gastroenteritis in a nursing home (Region 5), 1 outbreak of gastroenteritis/foodborne associated with a Workplace (Region 5), 1 outbreak of gastroenteritis associated with a Daycare Center (Region 3) and 1 outbreak of gastroenteritis/foodborne associated with a Restaurant (Region 3).

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.90	14.40	15.27	10.15	12.71
Median Rate*	12.91	14.18	14.57	10.04	12.58

* Per 100,000 Residents

**Emergency Department Chief Complaints for Respiratory Syndrome
Rate Per 100,000 Residents**

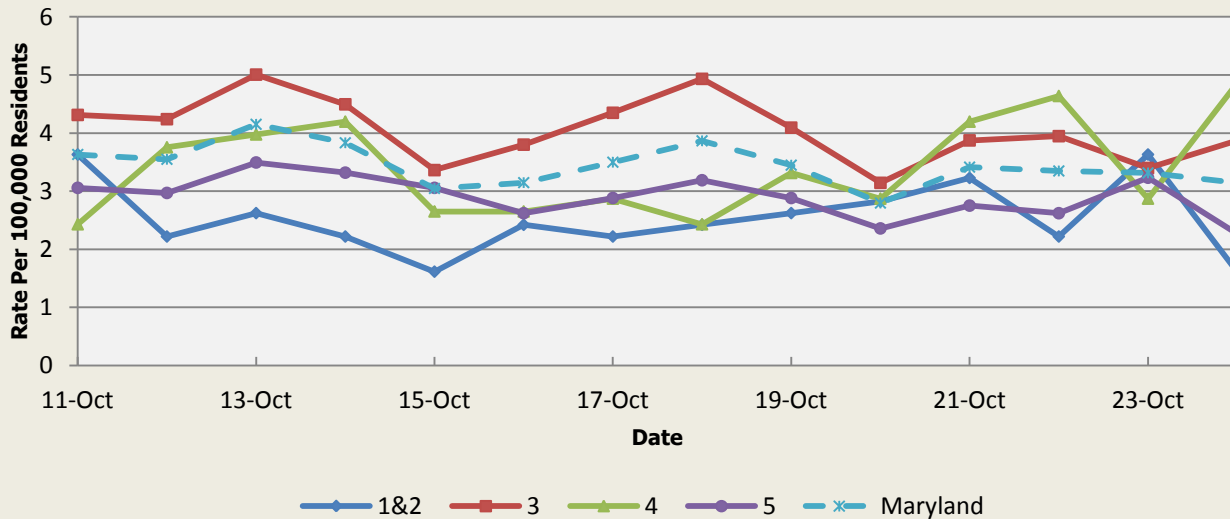

There were no respiratory outbreaks reported this week.

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	11.88	13.49	13.73	9.66	11.91
Median Rate*	11.49	13.01	13.25	9.30	11.51

* Per 100,000 Residents

**Emergency Department Chief Complaints for Fever Syndrome
Rate Per 100,000 Residents**

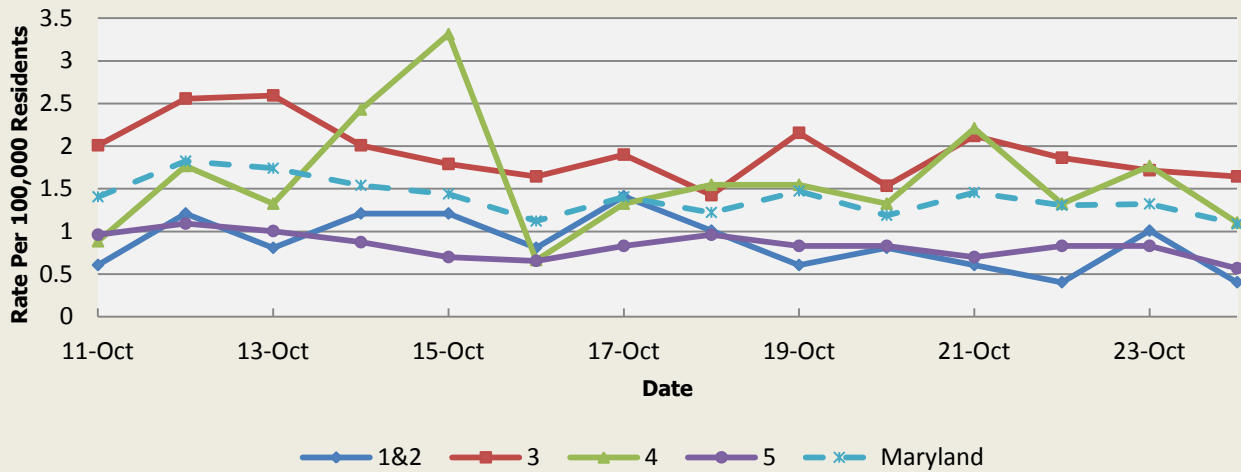

There were no fever outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.11	3.67	3.87	3.04	3.40
Median Rate*	3.02	3.54	3.75	2.92	3.28

Per 100,000 Residents

**Emergency Department Chief Complaints for Localized Lesion Syndrome
Rate Per 100,000 Residents**

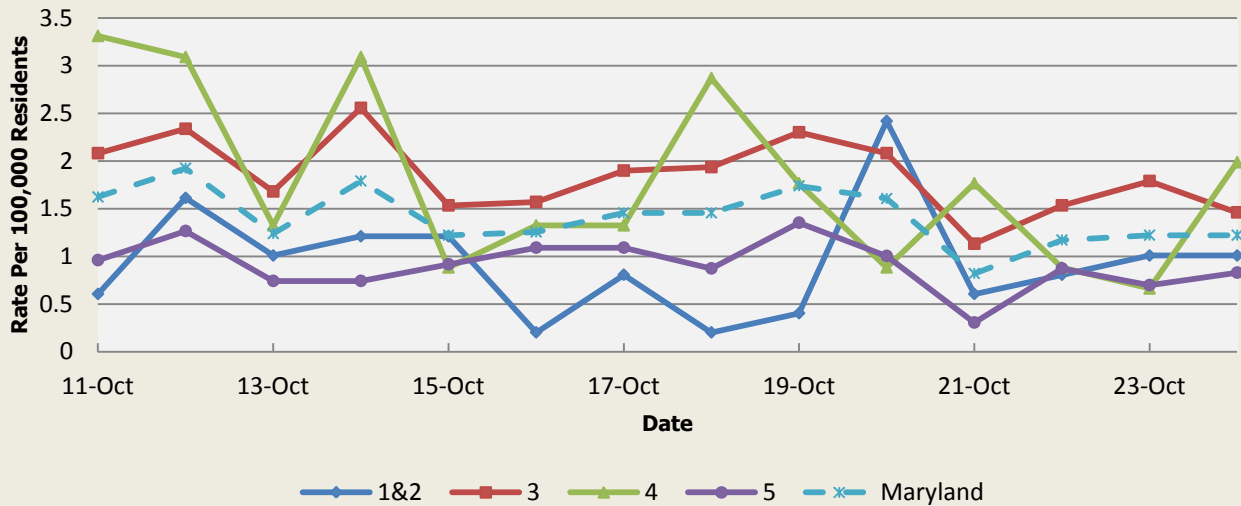

There were no localized lesion outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.10	1.93	2.05	1.00	1.51
Median Rate*	1.01	1.86	1.99	0.96	1.46

* Per 100,000 Residents

**Emergency Department Chief Complaints for Rash Syndrome
Rate Per 100,000 Residents**

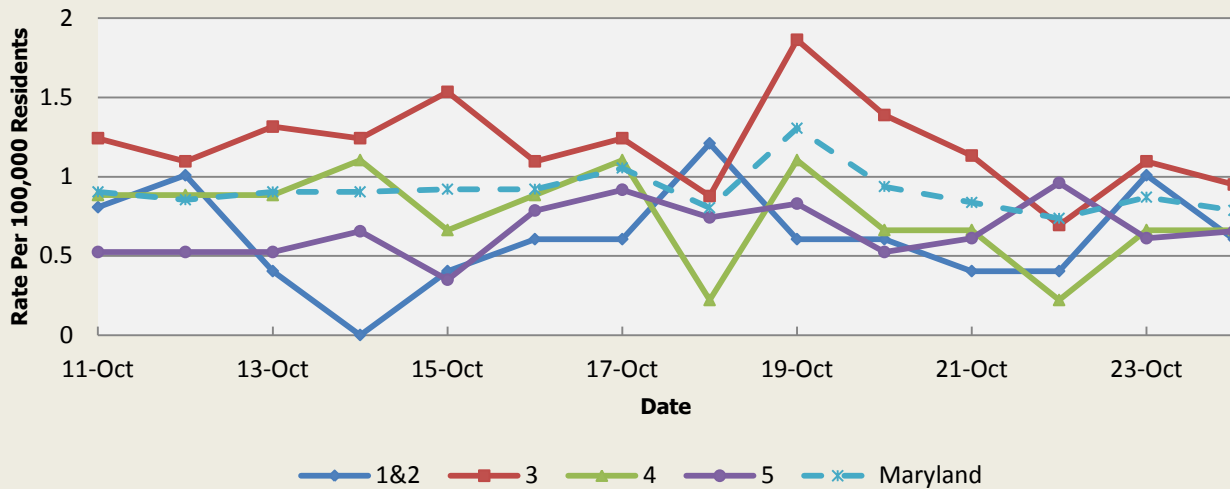

There were 4 rash outbreaks reported for Week 42: 2 outbreaks of Hand, Foot, and Mouth Disease associated with Daycare Centers (Region 3), and 2 outbreaks of Scabies associated with Nursing Homes (Region 3).

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.33	1.74	1.77	1.05	1.44
Median Rate*	1.21	1.68	1.77	1.00	1.41

* Per 100,000 Residents

**Emergency Department Chief Complaints for Neurological Syndrome
Rate Per 100,000 Residents**

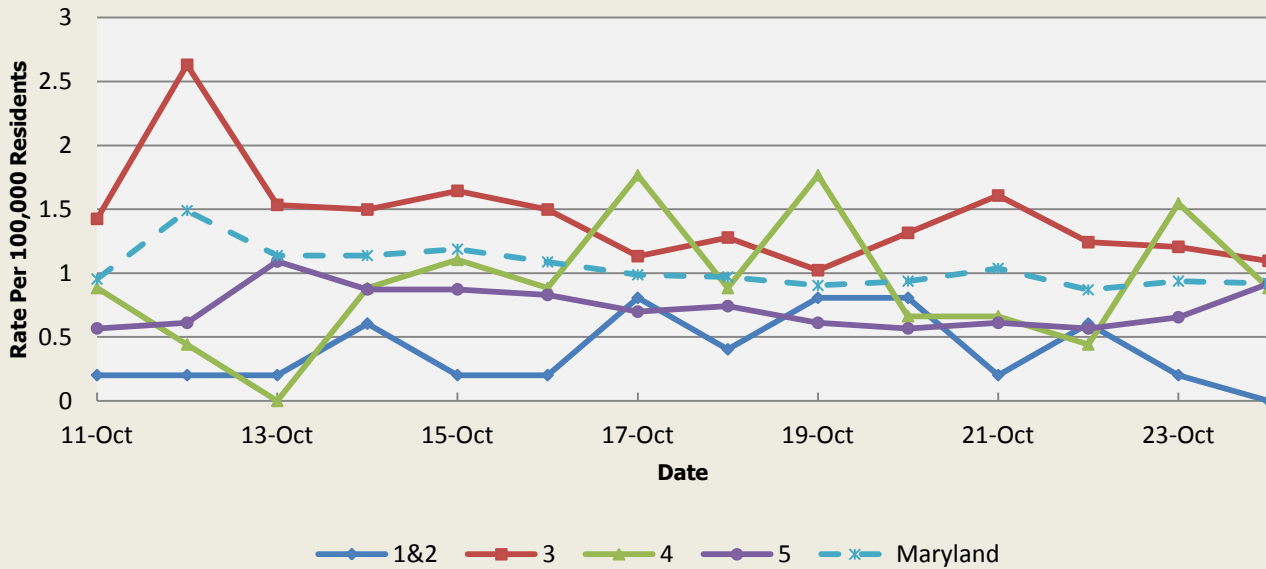

There were no Neurological Syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.62	0.68	0.62	0.45	0.58
Median Rate*	0.60	0.62	0.66	0.44	0.55

* Per 100,000 Residents

**Emergency Department Chief Complaints for Severe Illness or Death Syndrome
Rate Per 100,000 Residents**

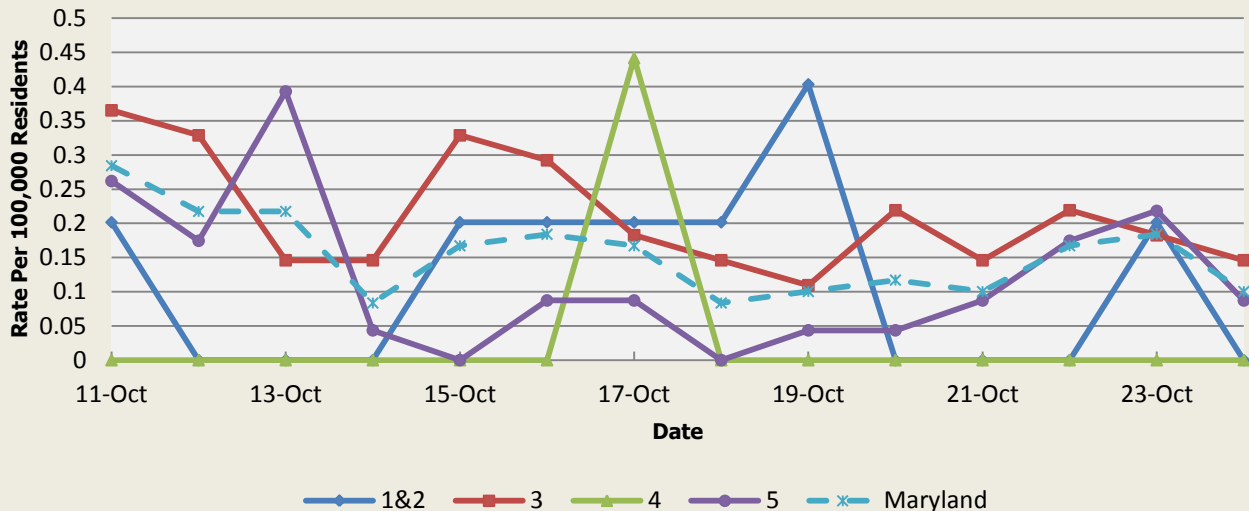

There were no severe illness or death outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.74	0.96	0.88	0.43	0.73
Median Rate*	0.60	0.95	0.88	0.39	0.72

* Per 100,000 Residents

SYNDROMES RELATED TO CATEGORY A AGENTS

**Emergency Department Chief Complaints for Botulism-like Syndrome
Rate Per 100,000 Residents**

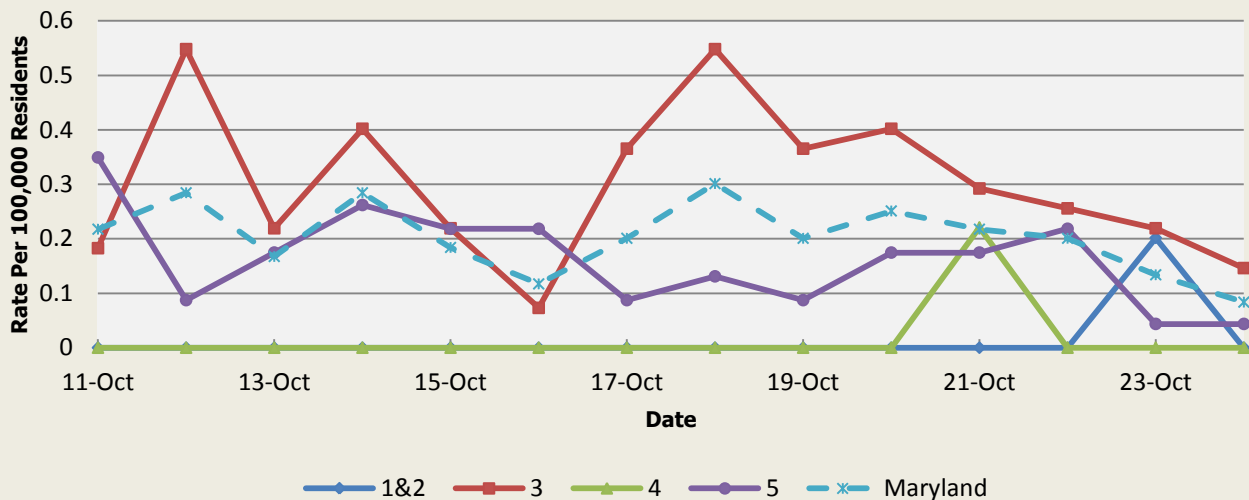

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 10/18 (Regions 1&2,3), 10/19 (Region 1&2), 10/20 (Region 3), 10/21 (Region 3), 10/22 (Regions 3,5), 10/23 (Regions 1&2,3,5), 10/24 (Regions 3,5). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.06	0.06	0.04	0.04	0.05
Median Rate*	0.00	0.04	0.00	0.04	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Hemorrhagic Illness Syndrome
Rate Per 100,000 Residents**

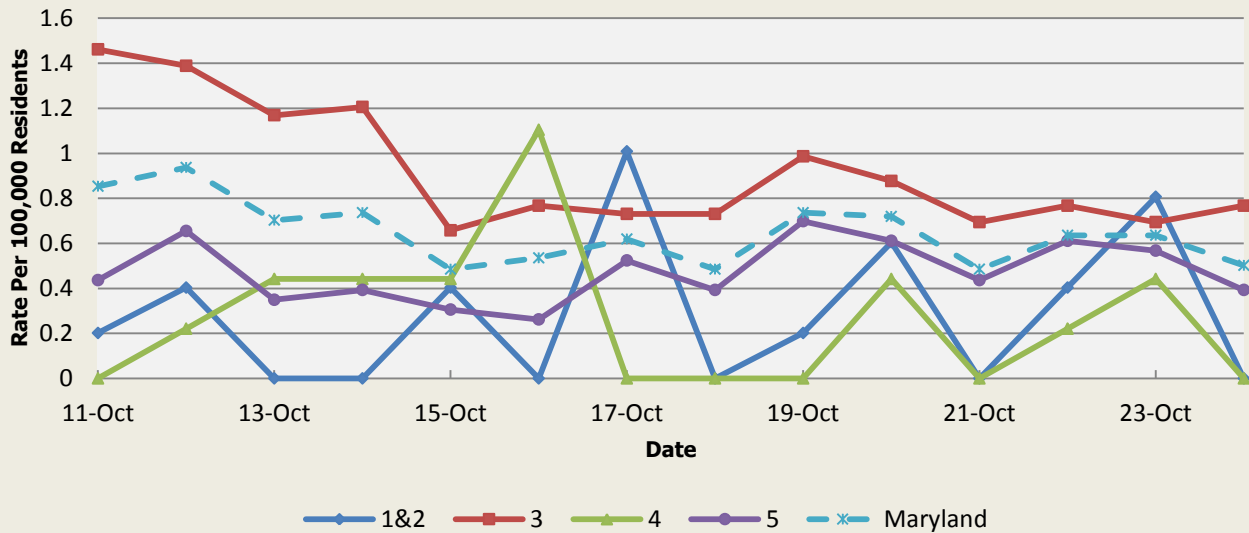

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 10/18 (Regions 3,5), 10/19 (Region 3), 10/20 (Regions 3,5), 10/21 (Regions 3,4,5), 10/22 (Regions 3,5), 10/23 (Regions 1&2,3) and 10/24 (Region 3). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.03	0.07	0.03	0.05	0.06
Median Rate*	0.00	0.04	0.00	0.04	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Lymphadenitis Syndrome
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 10/19 (Regions 3,5), 10/20 (Regions 3,5), 10/22 (Region 5), and 10/23 (Regions 1&2,5). These increases are not known to be associated with any outbreaks.

**Lymphadenitis Syndrome Baseline Data
January 1, 2010 - Present**

Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.31	0.41	0.34	0.27	0.34
Median Rate*	0.20	0.33	0.22	0.22	0.30

* Per 100,000 Residents

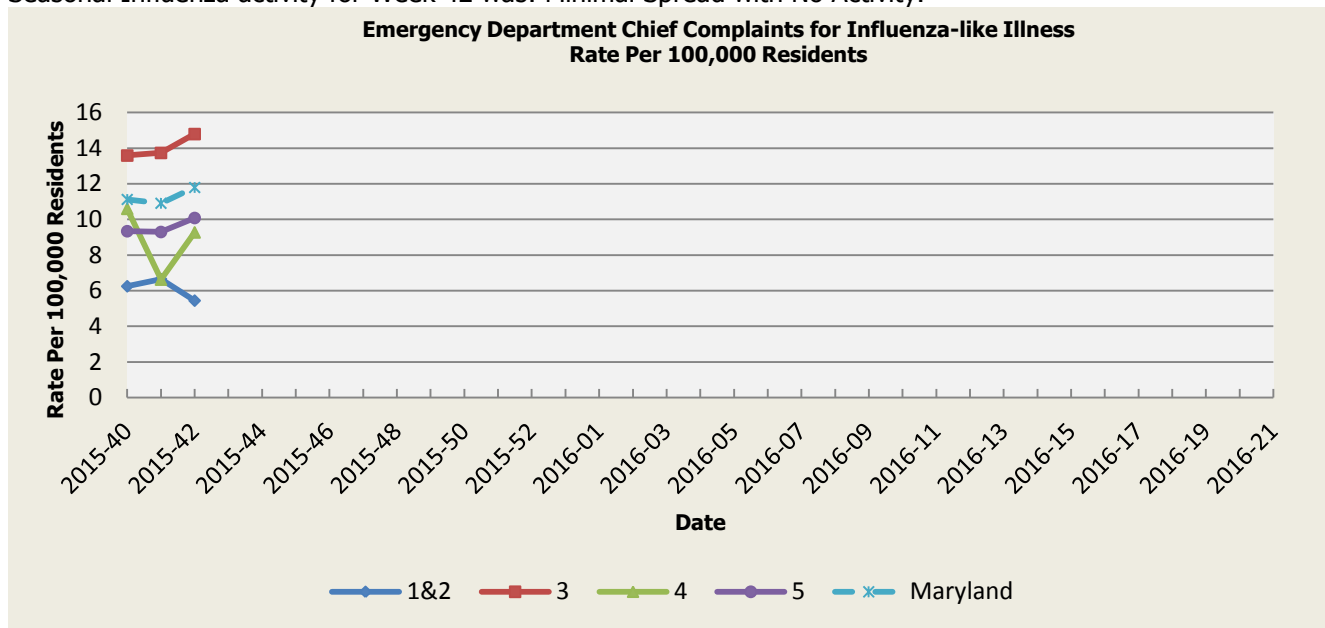

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Condition	Counts of Reported Cases†					
	October			Cumulative (Year to Date)**		
	2015	Mean*	Median*	2015	Mean*	Median*

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October through May). Seasonal Influenza activity for Week 42 was: Minimal Spread with No Activity.

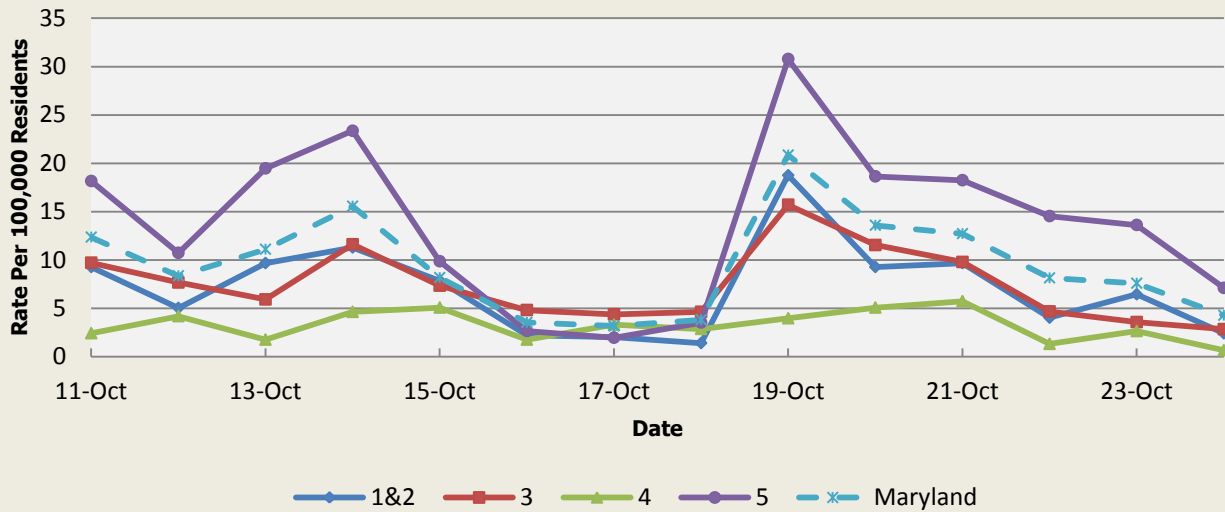

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	9.25	10.65	10.62	9.77	10.19
Median Rate*	7.66	8.44	8.61	7.51	8.00

* Per 100,000 Residents

Disclaimer on eMEDS flu related data: This data is based on EMS Pre-hospital care reports where the EMS provider has selected “flu like illness” as a primary or secondary impression of a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. This data is reported for trending purposes only.

**Over-the-Counter Medication Sales Related to Influenza
Rate Per 100,000 Residents**

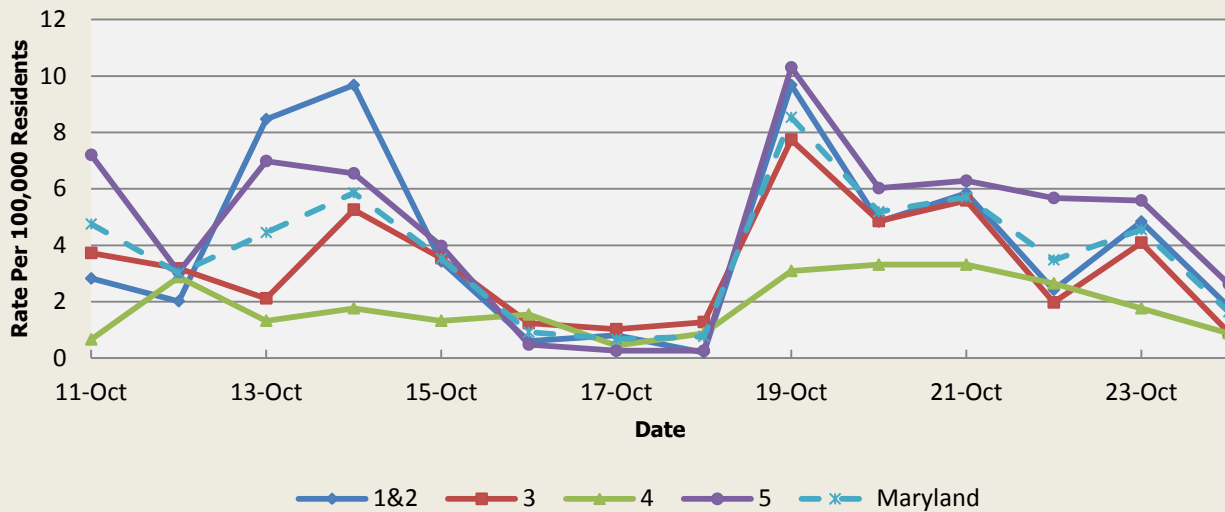

There was an appreciable increase above baseline in the rate of OTC flu medication sales on 10/19 (Regions 1&2,3,5).

	OTC Sales Baseline Data January 1, 2010 - Present				
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.38	6.05	3.07	13.75	8.72
Median Rate*	4.23	4.93	2.65	11.22	7.09

* Per 100,000 Residents

**Over-the-Counter Thermometer Sales
Rate Per 100,000 Residents**

There was not an appreciable increase above baseline in the rate of OTC thermometer sales this week.

	Thermometer Sales Baseline Data January 1, 2010 - Present				
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.63	4.67	3.34	7.70	5.81
Median Rate*	4.84	4.31	3.09	7.07	5.35

* Per 100,000 Residents

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. As yet, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national and global levels, are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of October 15, 2015, the WHO-confirmed global total (2003-2015) of human cases of H5N1 avian influenza virus infection stands at 844, of which 449 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

Avian Influenza in Humans:

There were no international reports of human cases of avian influenza this week.

There were no reports of human cases of avian influenza in the United States at the time that this report was compiled.

Avian Influenza in Poultry:

No avian influenza in poultry reports this week.

NATIONAL DISEASE REPORTS

LEGIONELLOSIS (WASHINGTON): 29 Oct 2015 Grocery store misters could be the source of a legionnaires' disease outbreak in Wenatchee [Washington State]. It's the 1st in North Central Washington in 10 years. Read More: <http://www.promedmail.org/post/3751553>

SHIGELLOSIS (CALIFORNIA): 22 OCT 2015 The number of people sickened by a bacterial disease connected with a San Jose restaurant continues to grow and has expanded to 5 counties, including Merced County, Santa Clara County public health officials announced Mon 26 Oct 2015. Read More: <http://www.promedmail.org/post/3748031>

HAND, FOOT, AND MOUTH DISEASE (WISONSIN): 23 Oct 2015 A recent outbreak of hand-foot-mouth disease, first recorded at Lakeland Union High School [LUHS, Minocqua, Wisconsin] last month [September 2015], has spread to 2 area elementary schools. An AV-W [Arbor Vitae Woodruff Elem School] nurse released a statement Friday morning [16 Oct 2015] notifying parents that there has been one documented case of the disease at the school. 2 days earlier, another MHLT [Minocqua-Hazelhurst-Lake Tomahawk Elementary School] nurse notified parents that there were 9 recorded cases at the Minocqua elementary school. INTERNATIONAL DISEASE REPORTS

There are no relevant international disease reports this week.

OTHER RESOURCES AND ARTICLES OF INTEREST

More information concerning Public Health and Emergency Preparedness can be found at the Office of Preparedness and Response website: <http://preparedness.dhmf.maryland.gov/> or follow us on Facebook at www.facebook.com/MarylandOPR.

More data and information on influenza can be found on the DHMH website: <http://phpa.dhmf.maryland.gov/influenza/fluwatch/SitePages/Home.aspx>

Please participate in the Maryland Resident Influenza Tracking System (MRITS): <http://flusurvey.dhmf.md.gov/>

NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
