

December 18, 2015

Public Health Preparedness and Situational Awareness Report: #2015:49 Reporting for the week ending 12/12/15 (MMWR Week #49)

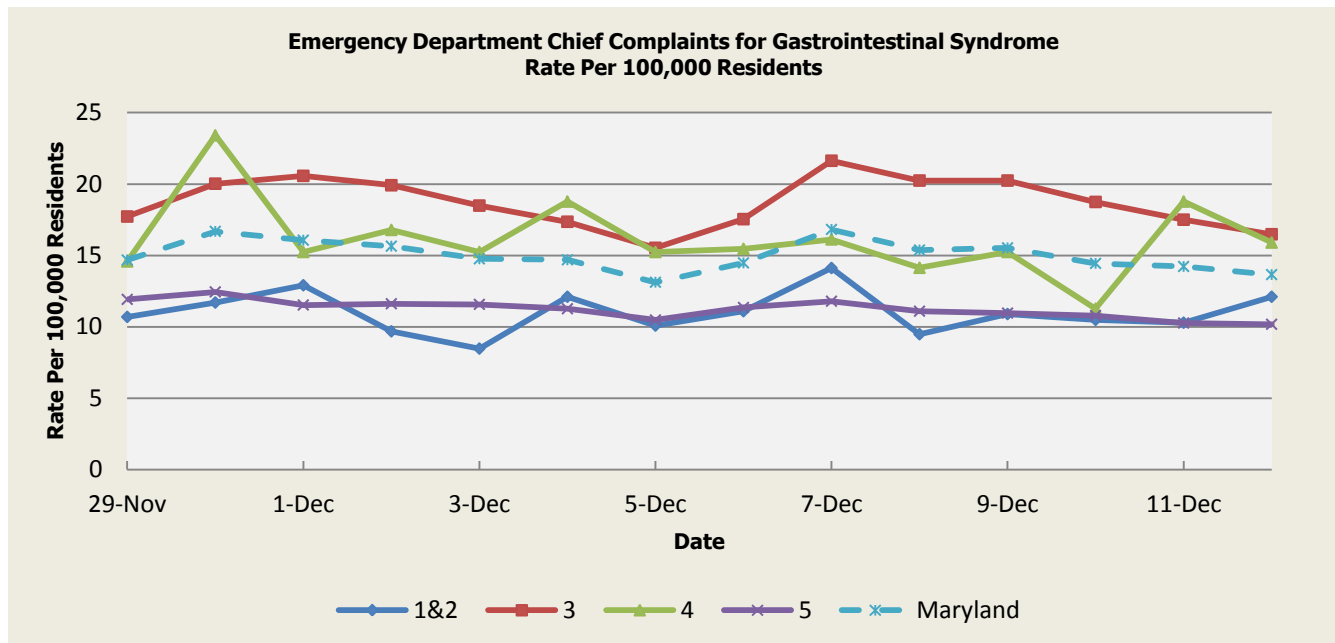

CURRENT HOMELAND SECURITY THREAT LEVELS

National: No Active Alerts
Maryland: Level Four (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics):

Graphical representation is provided for all syndromes (excluding the "Other" category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census.

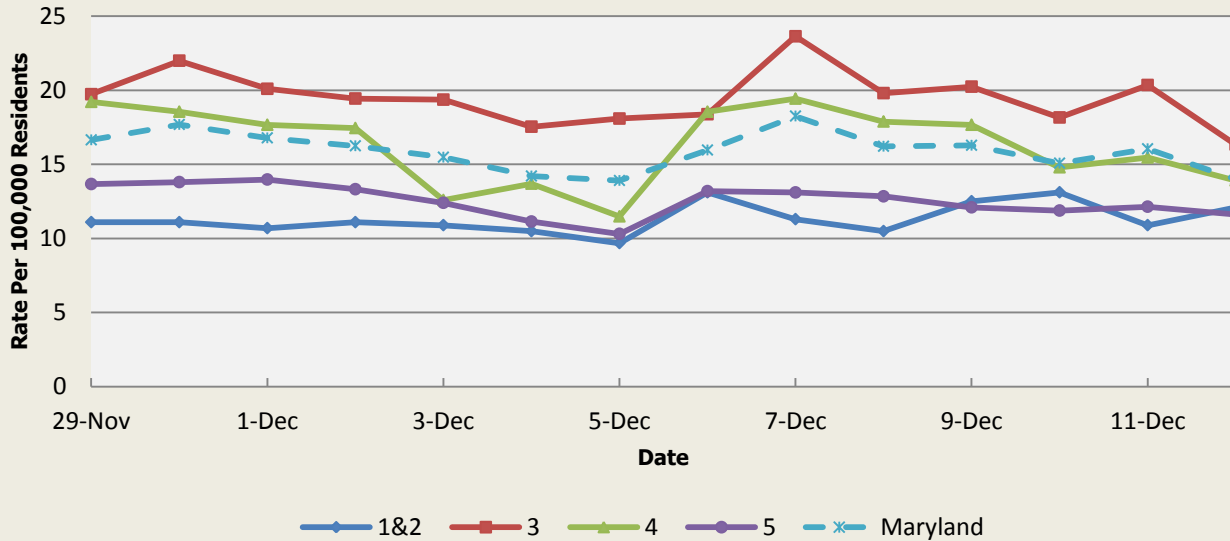

There were two gastrointestinal illness outbreaks reported this week: 1 outbreak of gastroenteritis associated with a nursing home (Region 3), and 1 outbreak of gastroenteritis/foodborne associated with a restaurant (Region 3).

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.88	14.48	15.26	10.16	12.75
Median Rate*	12.70	14.25	14.57	10.08	12.62

* Per 100,000 Residents

**Emergency Department Chief Complaints for Respiratory Syndrome
Rate Per 100,000 Residents**

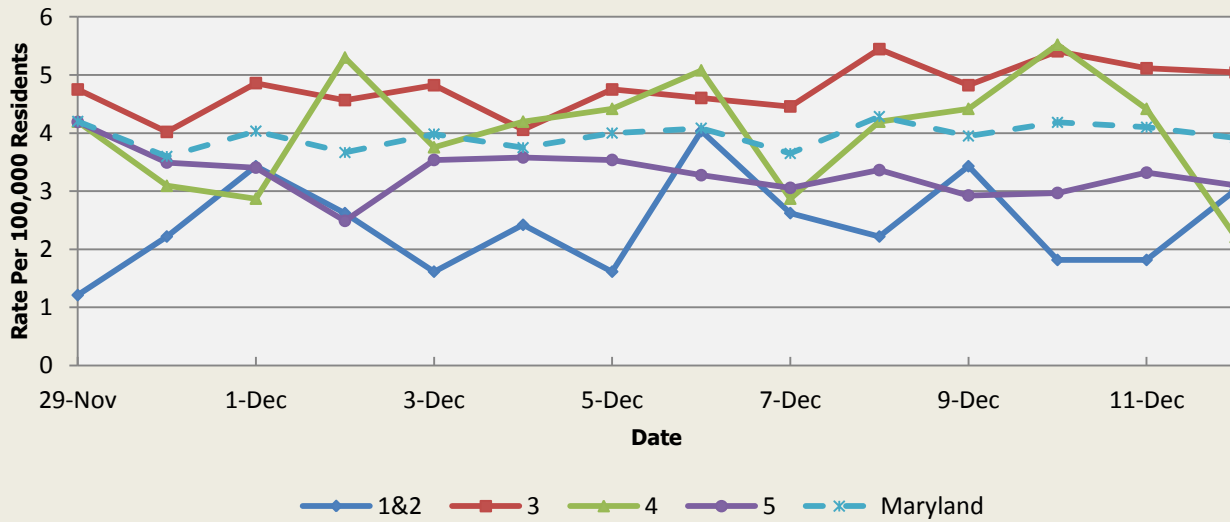

There were no respiratory outbreaks reported this week.

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	11.88	13.60	13.78	9.70	11.97
Median Rate*	11.49	13.08	13.47	9.34	11.59

* Per 100,000 Residents

**Emergency Department Chief Complaints for Fever Syndrome
Rate Per 100,000 Residents**

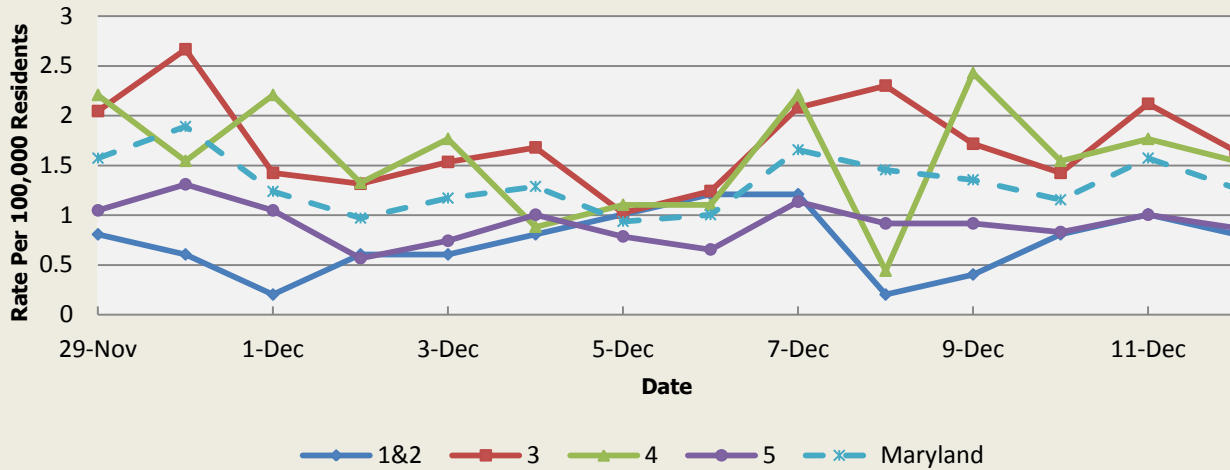

There were no fever outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.09	3.69	3.86	3.04	3.40
Median Rate*	3.02	3.54	3.75	2.97	3.30

Per 100,000 Residents

**Emergency Department Chief Complaints for Localized Lesion Syndrome
Rate Per 100,000 Residents**

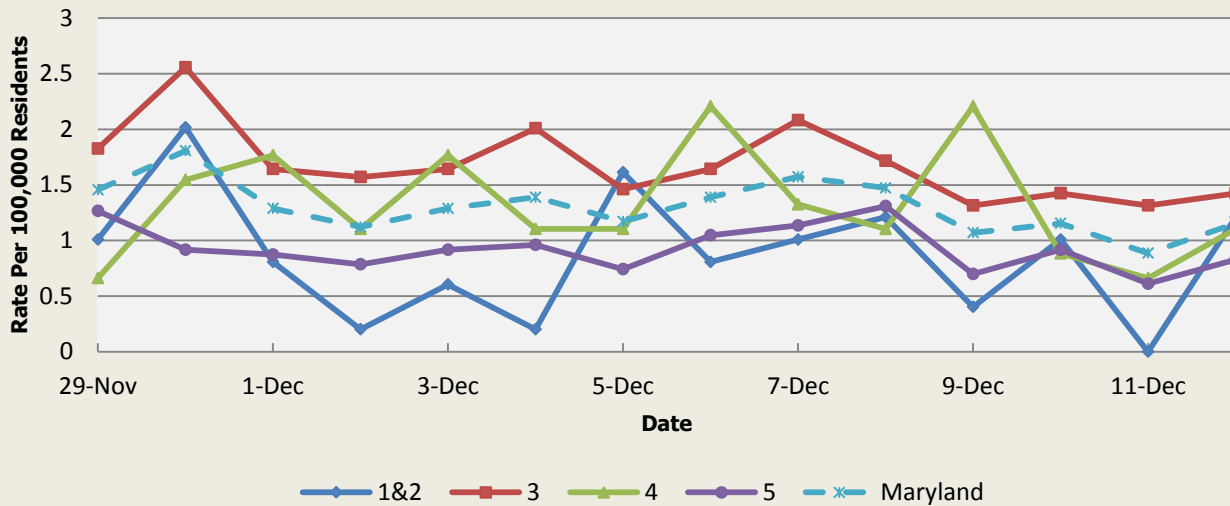

There were no localized lesion outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.09	1.92	2.04	0.99	1.51
Median Rate*	1.01	1.86	1.99	0.96	1.46

* Per 100,000 Residents

**Emergency Department Chief Complaints for Rash Syndrome
Rate Per 100,000 Residents**

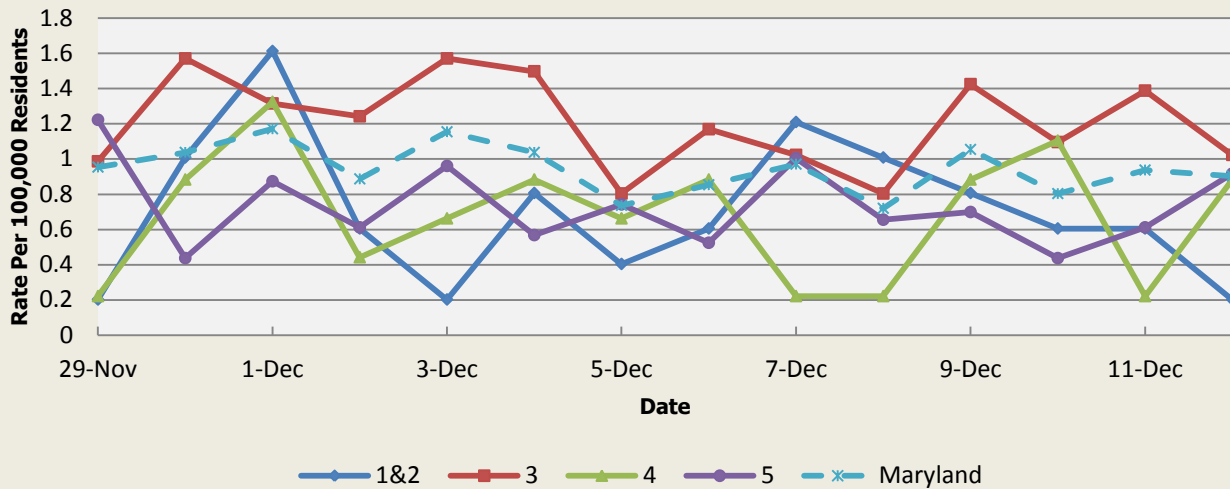

There were two rash outbreaks reported this week: 1 outbreak of scabies associated with a school (Region 5), and 1 outbreak of hand, foot and mouth disease associated with a daycare center (Region 3).

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.32	1.74	1.77	1.05	1.44
Median Rate*	1.21	1.68	1.77	1.00	1.41

* Per 100,000 Residents

**Emergency Department Chief Complaints for Neurological Syndrome
Rate Per 100,000 Residents**

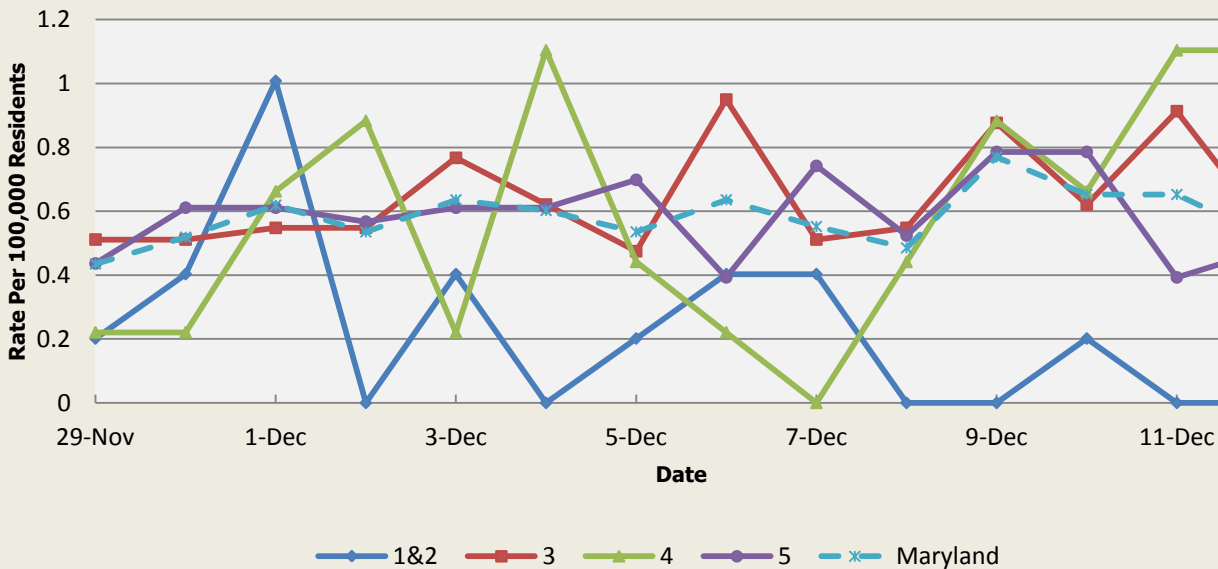

There were no neurological syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.62	0.69	0.63	0.46	0.59
Median Rate*	0.60	0.66	0.66	0.44	0.55

* Per 100,000 Residents

**Emergency Department Chief Complaints for Severe Illness or Death Syndrome
Rate Per 100,000 Residents**

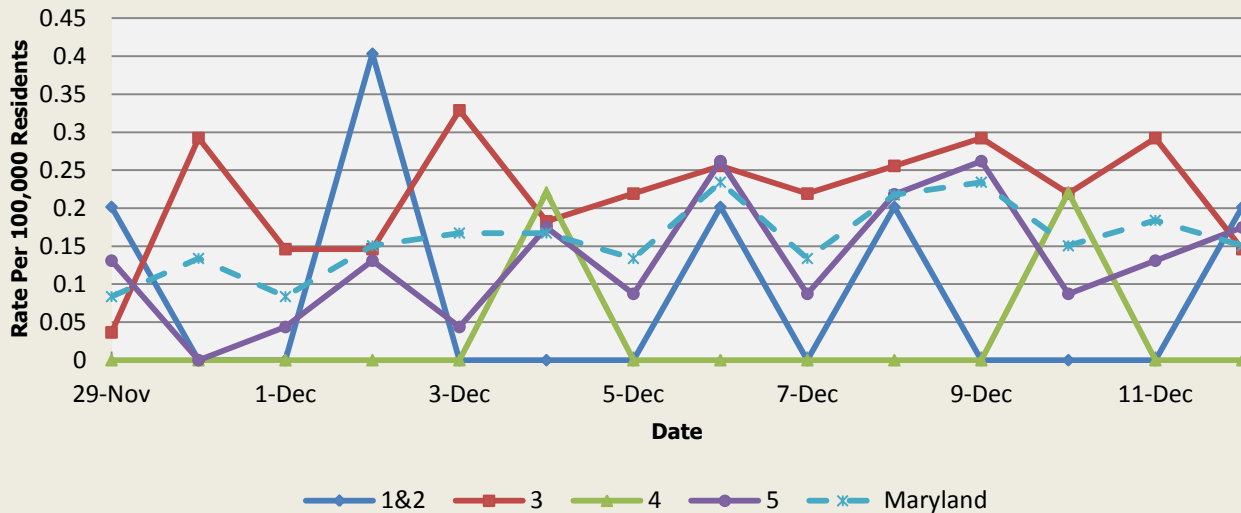

There were no severe illness or death outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.73	0.96	0.87	0.43	0.73
Median Rate*	0.60	0.95	0.88	0.44	0.72

* Per 100,000 Residents

SYNDROMES RELATED TO CATEGORY A AGENTS

**Emergency Department Chief Complaints for Botulism-like Syndrome
Rate Per 100,000 Residents**

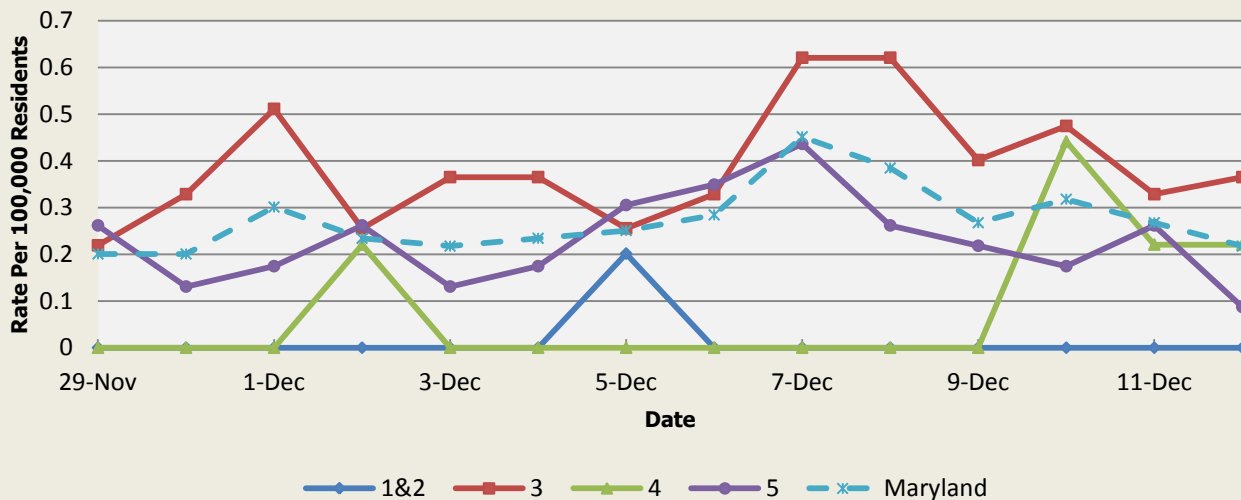

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 12/6 (Regions 1&2,3,5), 12/7 (Regions 3,5), 12/8 (Regions 1&2,3,5), 12/9 (Regions 3,5), 12/10 (Regions 3,4,5), 12/11 (Regions 3,5), and 12/12 (Regions 1&2,3,5). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.06	0.07	0.04	0.04	0.06
Median Rate*	0.00	0.04	0.00	0.04	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Hemorrhagic Illness Syndrome
Rate Per 100,000 Residents**

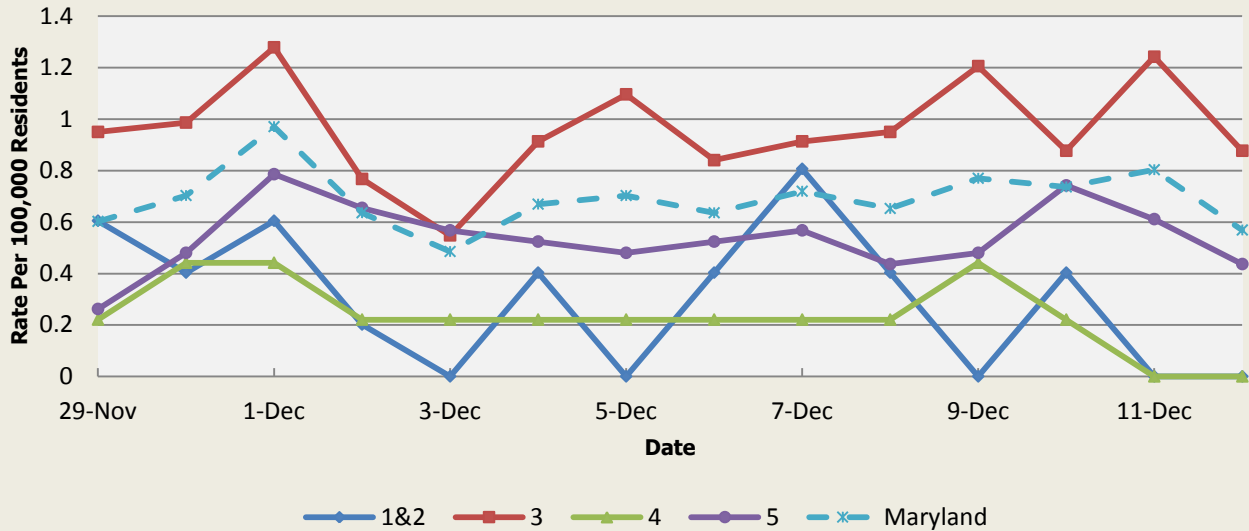

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 12/6 (Regions 3,5), 12/7 (Regions 3,5), 12/8 (Regions 3,5), 12/9 (Regions 3,5), 12/10 (Regions 3,4,5) 12/11 (Regions 3,4,5), and 12/12 (Regions 3,4). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.03	0.08	0.03	0.06	0.06
Median Rate*	0.00	0.04	0.00	0.04	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Lymphadenitis Syndrome
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 12/6 (Region 3), 12/7 (Regions 1&2,3,5), 12/8 (Region 3), 12/9 (Region 3), 12/10 (Regions 3,5), 12/11 (Regions 3,5), and 12/12 (Region 3). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.31	0.42	0.34	0.27	0.35
Median Rate*	0.20	0.33	0.22	0.22	0.30

* Per 100,000 Residents

OTHER OUTBREAKS REPORTED IN MARYLAND

There was one other outbreak reported this week: 1 outbreak of group A streptococcal pharyngitis associated with a school (Region 4).

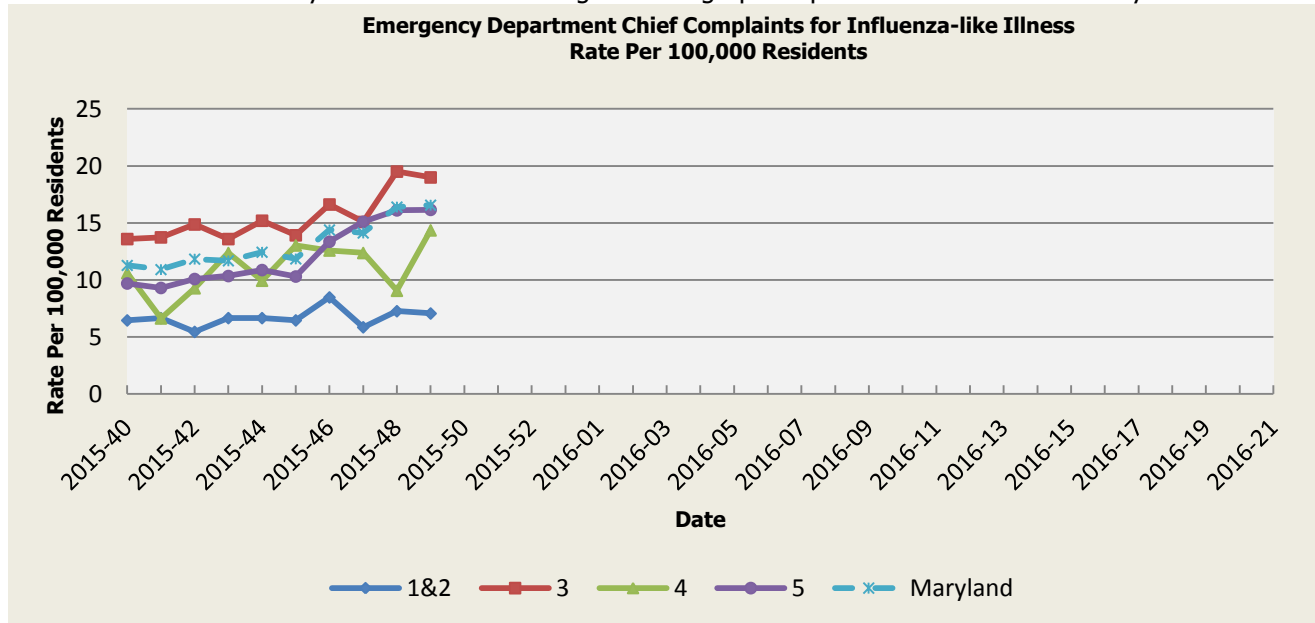

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Condition	Counts of Reported Cases†					
	December			Cumulative (Year to Date)**		
	2015	Mean*	Median*	2015	Mean*	Median*
Vaccine-Preventable Diseases						
Aseptic meningitis	7	16.8	17	453	433	450
Meningococcal disease	0	0.2	0	2	7	7
Measles	0	0	0	0	0.6	0
Mumps	0	0.6	0	21	21.6	4
Rubella	0	0	0	1	1.2	1
Pertussis	0	7.8	7	95	203.2	200
Foodborne Diseases						
Salmonellosis	6	20.4	17	801	903.4	906
Shigellosis	6	4.6	3	215	157	128

Legionellosis	2	3.6	4	128	133.2	138

† Counts are subject to change *Timeframe of 2009-2014 **Includes January through current month

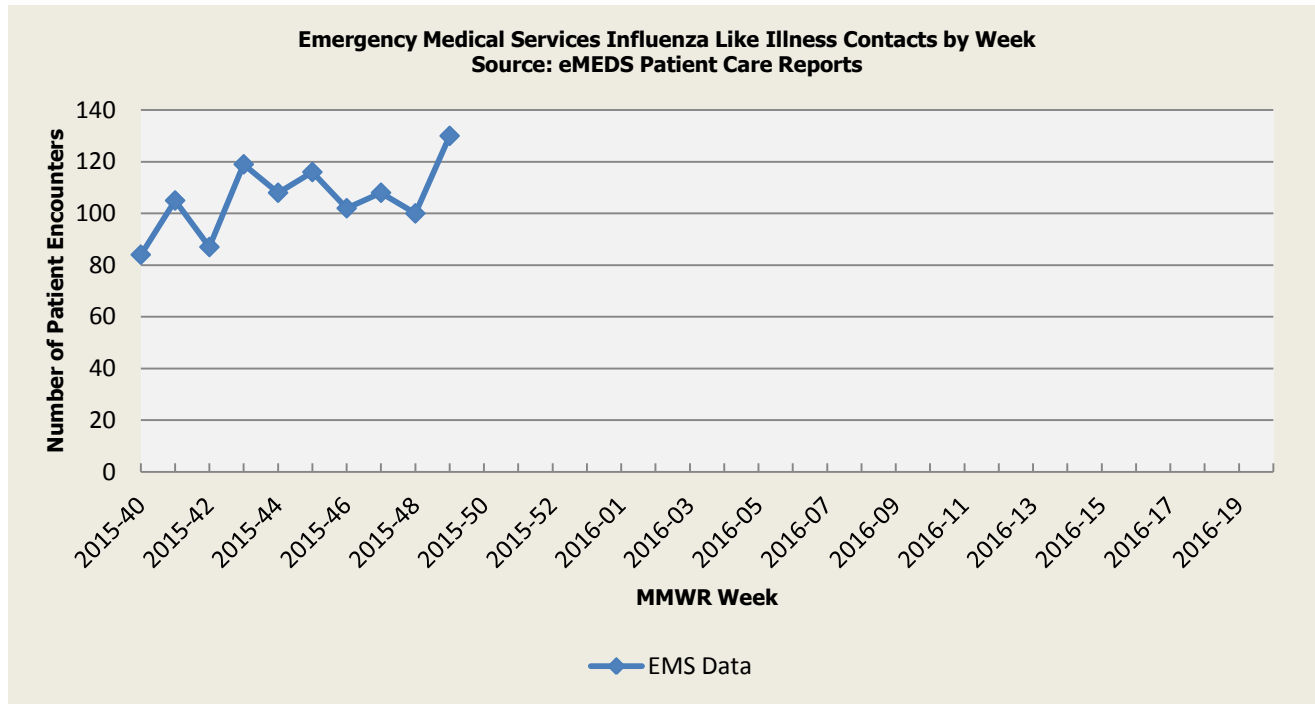

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October through May). Seasonal Influenza activity for Week 49 was: Regional Geographic Spread with Minimal Intensity.

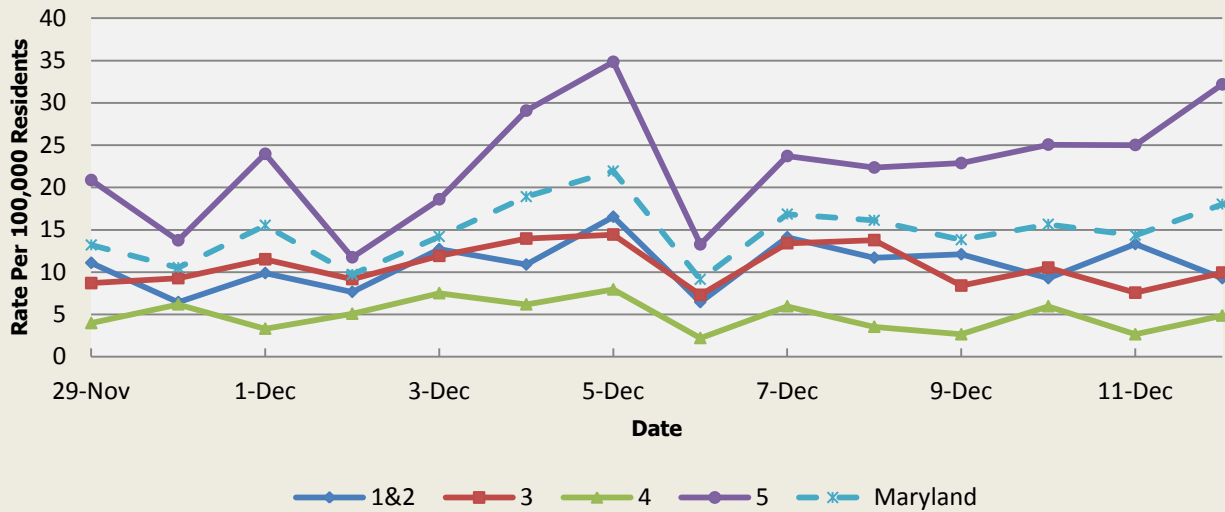

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	9.27	10.85	10.72	9.93	10.35
Median Rate*	7.46	8.59	8.83	7.66	8.20

* Per 100,000 Residents

Disclaimer on eMEDS flu related data: This data is based on EMS Pre-hospital care reports where the EMS provider has selected "flu like illness" as a primary or secondary impression of a patient's illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. This data is reported for trending purposes only.

**Over-the-Counter Medication Sales Related to Influenza
Rate Per 100,000 Residents**

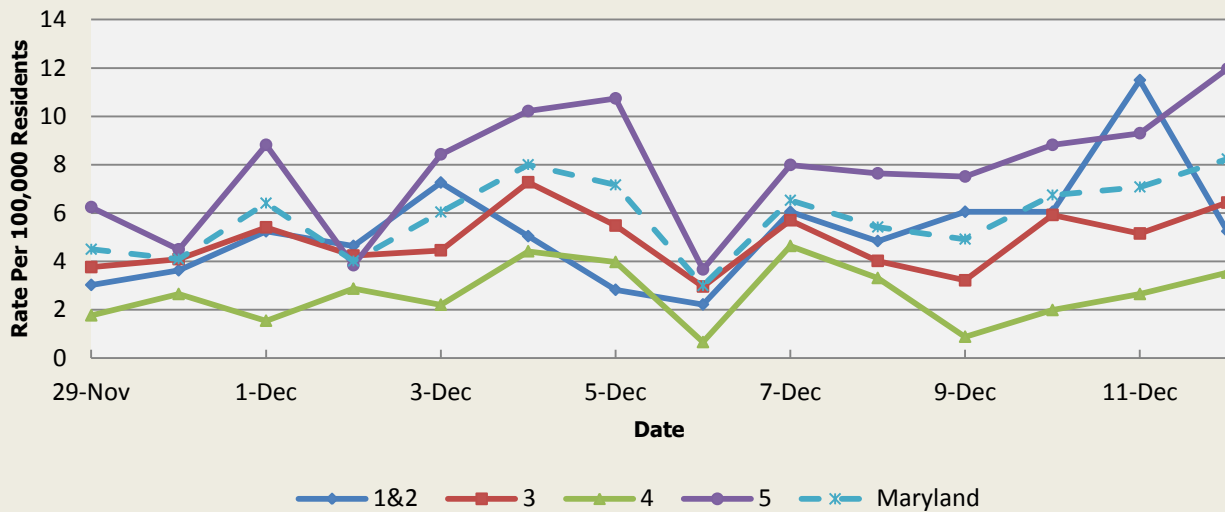

There was an appreciable increase above baseline in the rate of OTC flu medication sales on 12/7 (Regions 1&2,3), 12/8 (Regions 1&2,3), 12/9 (Regions 1&2), 12/12 (Region 5), and 12/5 (Regions 1&2).

	OTC Sales Baseline Data January 1, 2010 - Present				
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.47	6.15	3.10	13.85	8.81
Median Rate*	4.23	5.11	2.65	11.35	7.24

* Per 100,000 Residents

**Over-the-Counter Thermometer Sales
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of OTC thermometer sales on 12/11 (Regions 1&2).

	Thermometer Sales Baseline Data January 1, 2010 - Present				
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.62	4.67	3.32	7.68	5.80
Median Rate*	4.84	4.31	3.09	7.07	5.35

* Per 100,000 Residents

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. As yet, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national and global levels, are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of December 14, 2015, the WHO-confirmed global total (2003-2015) of human cases of H5N1 avian influenza virus infection stands at 844, of which 449 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

Avian Influenza in Humans:

H9N2 (CHINA): 17 Dec 2015 Mainland China Anhui and Hunan recently added 4 cases of confirmed H9N2 flu: aged 1 to 15 years; 3 female, 1 male; date of onset between year 4 to 10 months; are mild; 1 case joined the family name to the market to buy food; no live poultry; remaining exposure history or exposure history is unknown. Read More: <http://www.promedmail.org/post/3867941>

There were no reports of human cases of avian influenza in the United States at the time that this report was compiled.

Avian Influenza in Poultry:

H5N3 (FRANCE): 15 Dec 2015 Low pathogenic avian influenza (poultry), France. Read More: <http://www.promedmail.org/post/3867109>

H5N9 (FRANCE): 12 Dec 2015 A new region of France has now been hit with highly pathogenic avian flu, as the head of the World Organization for Animal Health (OIE) says he doesn't expect a US-type outbreak because of different farming methods and lower virus virulence, according to media reports. The OIE, meanwhile, has posted details on 3 of the country's outbreaks, as well as on another outbreak of highly pathogenic H5N6 avian flu in Vietnam. Read More: <http://www.promedmail.org/post/3858875>

NATIONAL DISEASE REPORTS

There were no relevant national disease reports this week.

INTERNATIONAL DISEASE REPORTS

LEPTOSPIROSIS (UNITED KINGDOM): 17 Dec 2015 An investigation has been launched after an animal shelter volunteer contracted and died from a bacterial infection. Public Health England is investigating after a case of leptospirosis in Northamptonshire was reported to them. A volunteer from NANNA (Northamptonshire Animals In Need of Nurturing and Adoption) in Irthlingborough contracted the disease, a type of bacterial infection spread by animals, and has since died. Read More: <http://www.promedmail.org/post/3869731>

LEGIONELLOSIS (SPAIN): 17 Dec 2015 The Government of Castilla-La Mancha is following active protocol [after] an outbreak of Legionnaires' disease was detected this weekend in Ciudad de Manzanares. So far, 7 cases have been diagnosed; 2 have been dismissed and 5 others await results. Read More: <http://www.promedmail.org/post/3869362>

HEPATITIS A (INDONESIA): 14 Dec 2015 The Bogor Institute of Agriculture (IPB) has declared an extraordinary outbreak of hepatitis after dozens of its students were confirmed to be suffering from the liver disease. Read More: <http://www.promedmail.org/post/3859556>

OTHER RESOURCES AND ARTICLES OF INTEREST

More information concerning Public Health and Emergency Preparedness can be found at the Office of Preparedness and Response website: <http://preparedness.dhmm.maryland.gov/> or follow us on Facebook at www.facebook.com/MarylandOPR.

More data and information on influenza can be found on the DHMH website: <http://phpa.dhmm.maryland.gov/influenza/fluwatch/SitePages/Home.aspx>

Please participate in the Maryland Resident Influenza Tracking System (MRITS): <http://flusurvey.dhmm.md.gov/>

NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
